

# MUHAMMAD TABISH

## SOFTWARE ENGINEER

Lahore, Pakistan | tabishm484@gmail.com | +923204473558 | [LinkedIn](#) | [GitHub](#)

### OBJECTIVE

Detail-oriented Software Engineering graduate with strong programming fundamentals and practical knowledge of HTML, CSS, JavaScript, React.js, and Node.js. Experienced in building responsive web applications, designing relational databases, and implementing CRUD operations through academic projects. Excited to join a collaborative team and grow as a professional developer.

### SKILLS

HTML & CSS Tailwind CSS & Bootstrap	JavaScript React & Node JS	Express JS Mongo DB
--	-------------------------------	------------------------

### PROJECTS

- Exam Seating Arrangement System (FYP) | PHP, MySQL, HTML, CSS, JS** 2025
- Designed and developed a web-based system to automate exam seating plans for educational institutions.
  - Implemented relational database schemas with normalization, CRUD operations, and dynamic seat allocation algorithms.
  - Ensured efficient resource utilization and error-free scheduling with secure data management.
- Ecommerce Website | React.js, Tailwind CSS** 2024
- Developed a fully responsive e-commerce website clone using React.js and Tailwind CSS.
  - Built a scalable, component-based architecture to enhance performance and enable dynamic content rendering.
  - Applied React Hooks for effective state management and lifecycle control.
  - Designed and implemented reusable UI components to ensure consistency and streamline the development process.

- To Desktop | HTML, Tailwind CSS** 2024
- Recreated the responsive design of the ToDesktop official website using HTML and Tailwind CSS.
  - Gained hands-on experience in component-based styling and improving overall UI/UX aesthetics.

### EDUCATION

<b>Bachelor In Software Engineering</b> Virtual University	<b>Oct 2021 - Aug 2025</b>
---	----------------------------
